Heatmap illustrating the Return on Investment (ROI) for pig production across different months (X-axis) and years (Y-axis). The color scale represents the ROI, ranging from -\$100 (dark blue) to \$100 (dark red).

The X-axis (Months) includes: Jan, Feb, Mar, Apr, May, Jun, Jul, Aug, Sep, Oct, Nov, Dec.

The Y-axis (Years) includes: 2005, 2010, 2015, 2020, 2025.

Key observations from the heatmap:

- ROI is generally negative (blue shades) in the early years (2005-2010) and for most months, except for a few positive values in the later years.
- ROI becomes increasingly positive (orange to red shades) starting around 2015, peaking in the later years (2020-2025).
- High positive ROI (dark red) is concentrated in the months of June, July, and August, particularly in the years 2015, 2020, and 2025.
- ROI is generally lower (lighter shades) in the months of January, February, and March.
